

Zahlen bis 20 zerlegen

Oben steht die Gesamtzahl. Schreibe die fehlende Zahl in jeden Korb.

Otter Mila verteilt ihre Kieselsteine auf zwei Körbe. Hilf ihr, die Zahlen zu ergänzen!

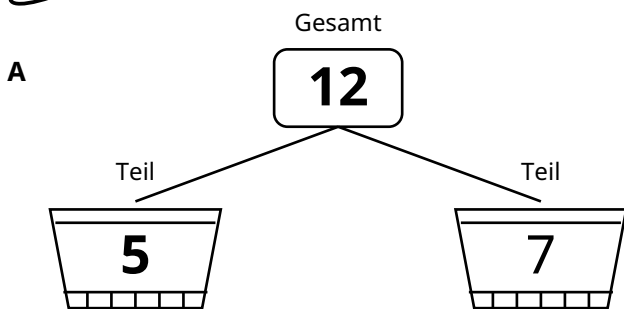

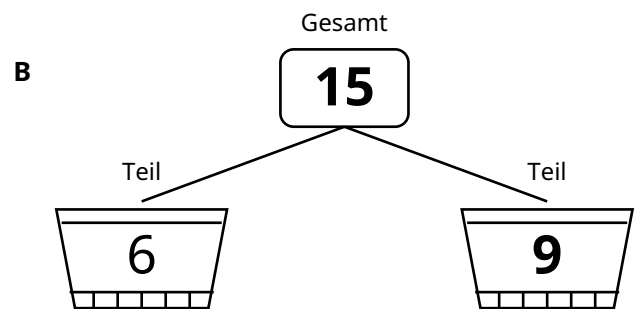

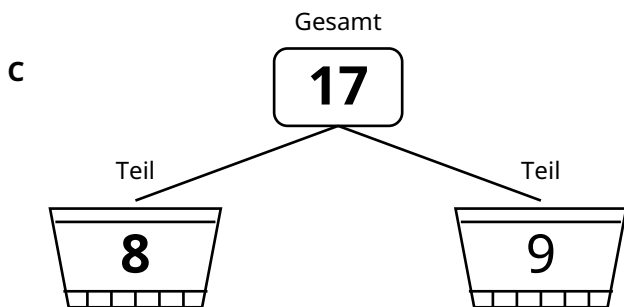

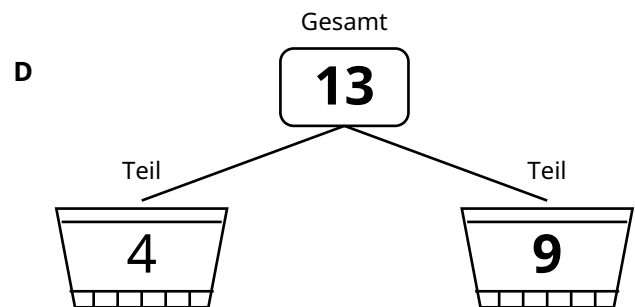

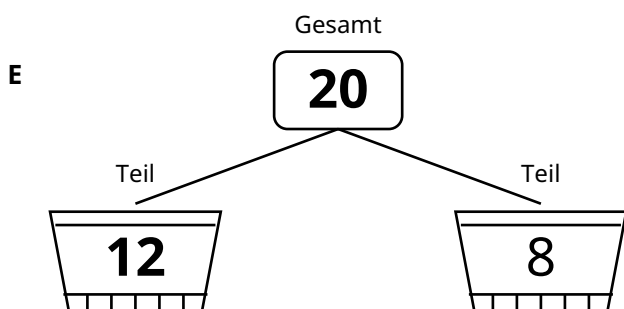

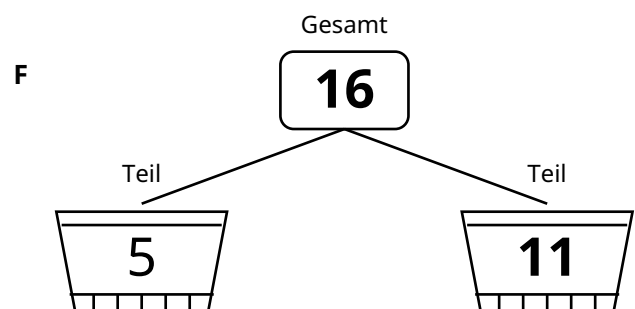

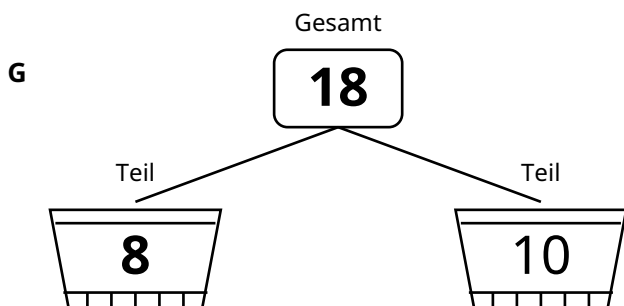

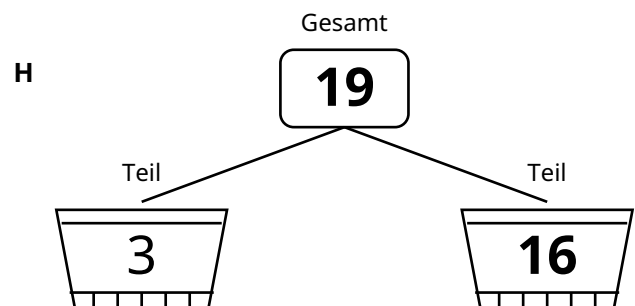

Beispiel: Zwei Teile ergeben das Ganze

$$8 + 6 = 14$$

8 + 6 = 14: Es fehlen 6 Kieselsteine.

Prüfe: Beide Teile zusammen ergeben die Gesamtzahl.
