Picture Shape Analogies

Look at how the first shape changes into the second, then circle choice (1), (2), or (3) that follows the exact same rule.

Detective Zelie the ferret is solving a shape mystery: spot the hidden rule and circle the matching figure on every row!

Example: circle split vertically, left half shaded -> square follows the same rule.

6 shape mysteries: circle the matching figure (1), (2), or (3)

1 : → **(2)**

Vertical split, left half shaded

(1) (2) (3)

2 : → **(3)**

Small solid dot inside center

(1) (2) (3)

3 : → **(1)**

Flipped upside down

(1) (2) (3)

4 : → **(2)**

Double concentric outline

(1) (2) (3)

5 : → **(1)**

X-diagonals, top quarter shaded

(1) (2) (3)

6 : → **(3)**

Horizontal split, bottom half shaded

(1) (2) (3)

Detective tip: say the transformation aloud in simple words (split left, flipped, doubled, dot inside) before checking the three choices.
