Two-Way Logic Grids: Shapes & Sizes

Follow the row and column to where they meet, then draw the matching shape, pattern, or size in each dotted box.

In her tidy puzzle studio, Zelie the logic ferret sorts shapes into smart grids. Help her complete every missing box!

Example: Row (shape) + Column (pattern) = cell picture.

2×2 Key ↓ + →	Plain	Striped
Circle		
Diamond		

1. Shape × Pattern Matrix (4 guides given, 5 boxes to draw)

Shape / Pattern ↓ + →	Plain outline	Vertical stripes	Dotted fill
Circle			
Triangle			
Square			

2. Object × Size Matrix (3 guides given, 6 boxes to draw)

Object / Size ↓ + →	Small	Medium	Large
Star			
Heart			
House			

Tip: put one finger on the row picture and one finger on the column header, then slide them until they meet in the target cell.
