PAPILUMO / Pre-K (ages 4–5) · Answer Key

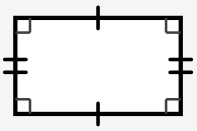

All About the Rectangle Shape

Trace the dotted rectangles, count the sides and corners, then circle the rectangular objects.

A rectangle has 4 sides (2 long, 2 short) and 4 square corners!

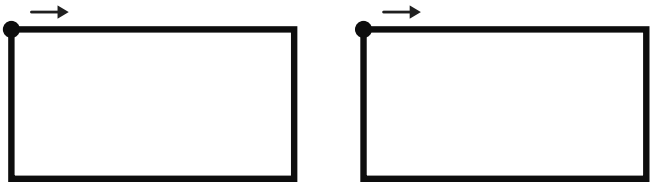

Example: a rectangle

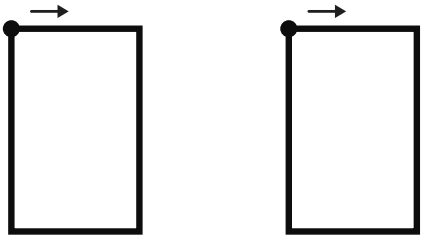

- **2 long opposite sides**
- **2 short opposite sides**
- **4 square corners**

1. Trace the horizontal and vertical dotted rectangles

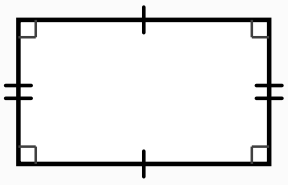

Horizontal rectangles

Vertical rectangles

2. Look at the rectangle and write how many sides and corners it has

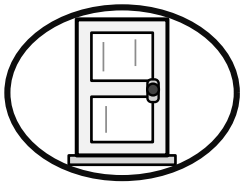

Sides **4**

Corners **4**

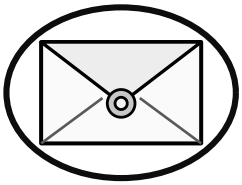

3. Circle the four real-world objects shaped like a rectangle

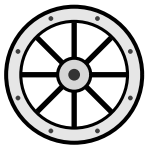

Wooden door

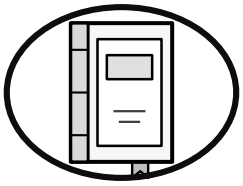

Pizza slice

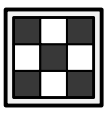

Sealed envelope

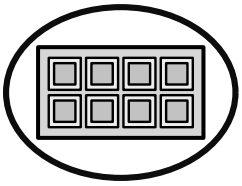

Wagon wheel

Storybook

Square tile

Chocolate bar

Basile's tip: match the two opposite long sides and the two opposite short sides with your finger.
