All About the Rectangle Shape

Trace the dotted rectangles, count the sides and corners, then circle the rectangular objects.

A rectangle has 4 sides (2 long, 2 short) and 4 square corners!

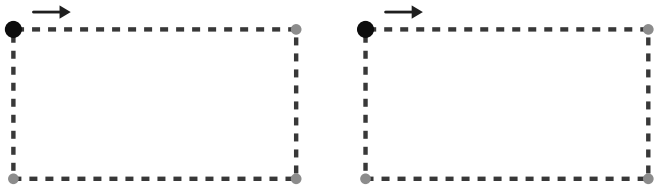

Example: a rectangle

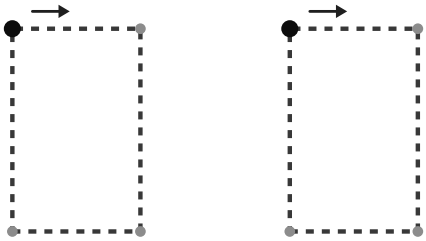

- **2 long opposite sides**
- **2 short opposite sides**
- **4 square corners**

1. Trace the horizontal and vertical dotted rectangles

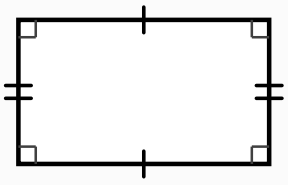

Horizontal rectangles

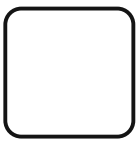

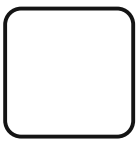

Vertical rectangles

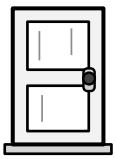

2. Look at the rectangle and write how many sides and corners it has

Sides  

Corners  

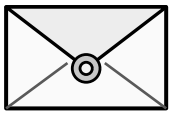

3. Circle the four real-world objects shaped like a rectangle

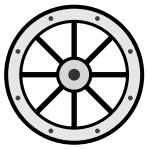

Wooden door

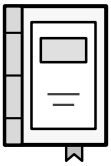

Pizza slice

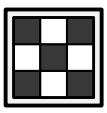

Sealed envelope

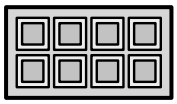

Wagon wheel

Storybook

Square tile

Chocolate bar

Basile's tip: match the two opposite long sides and the two opposite short sides with your finger.
