Mountain Peaks & Crown Zigzags

Draw crisp straight lines from corner dot to corner dot, pausing at each peak and valley, then complete and color the crown and mountains.

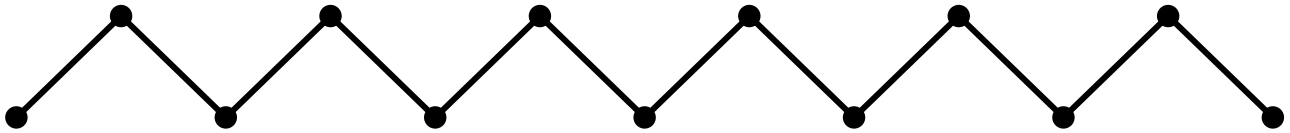

Rule the zigzags with Rex! Pause your pencil right on each big corner dot before pivoting sharply up or down each peak.

Example: 3-peak crown zigzag

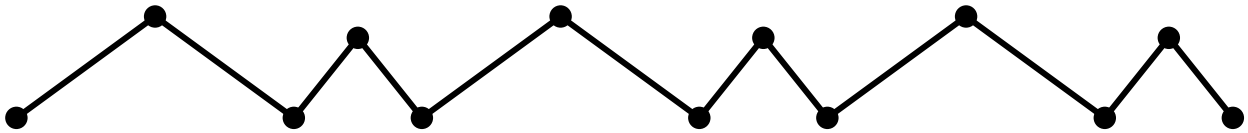

1. Zigzag rows: pause on each bold corner dot before pivoting to the next peak

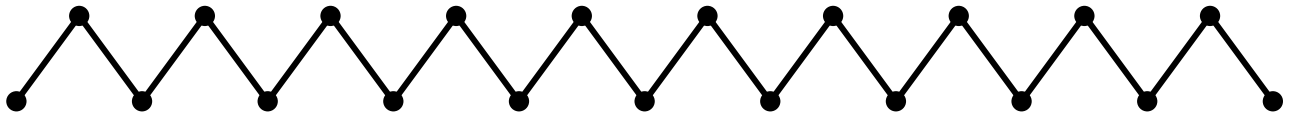

Tall mountain peaks

Wide-and-narrow rhythm peaks

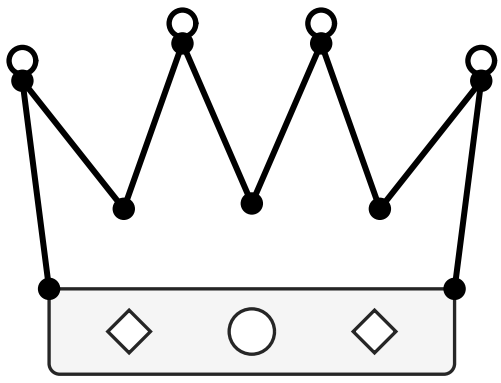

Tight sawtooth teeth

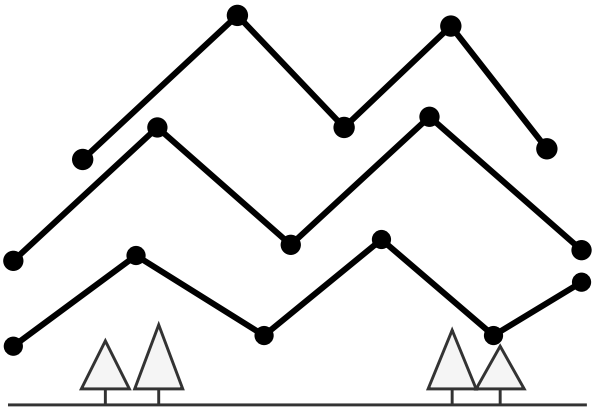

2. Complete the dotted zigzag tops on the royal crown and alpine mountains, then color

A. 4-peak royal crown

B. 3-tier alpine mountains

Rex's tip: pause for one beat on every big black corner dot so your peaks stay sharp and pointed instead of rounded.
