Name : _____ Date : _____

PAPILUMO / Pre-K (ages 4–5) • Answer key

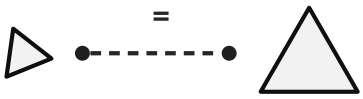

Same Shape, Different Size

Draw lines to match each small shape to its large twin, then circle the two shapes of the same type in each row.

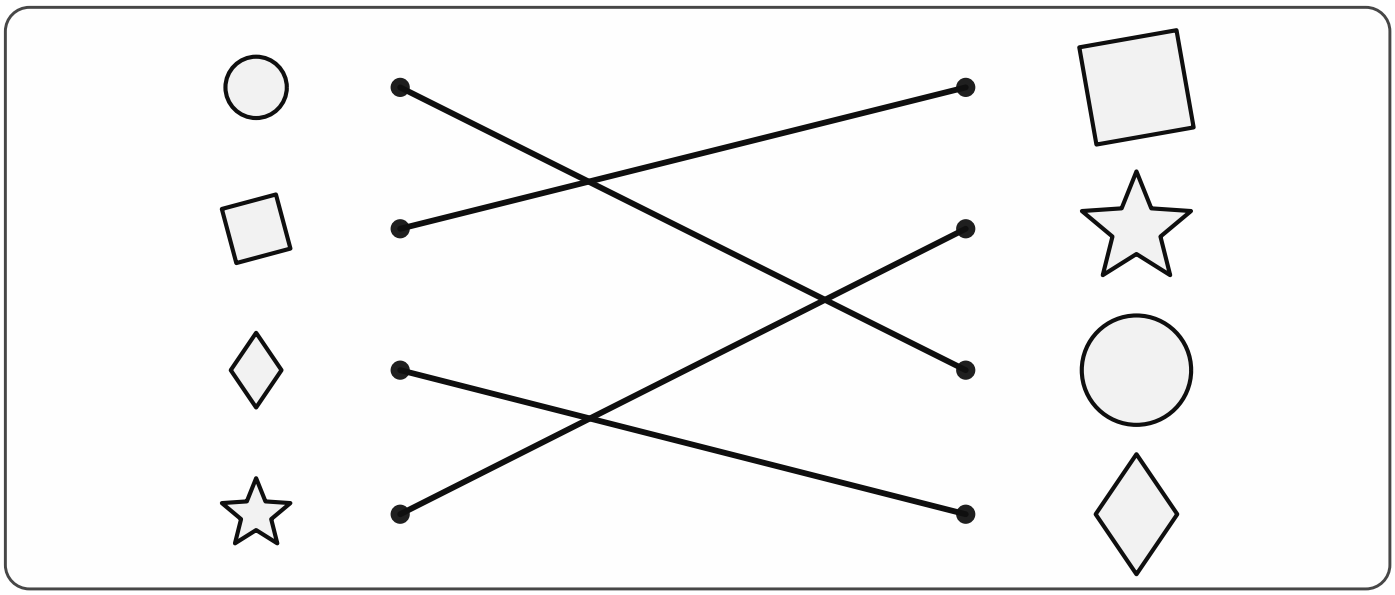

Noa the chameleon loves changing size! Help Noa pair shapes from the exact same family, even when one is tiny and the other is huge.

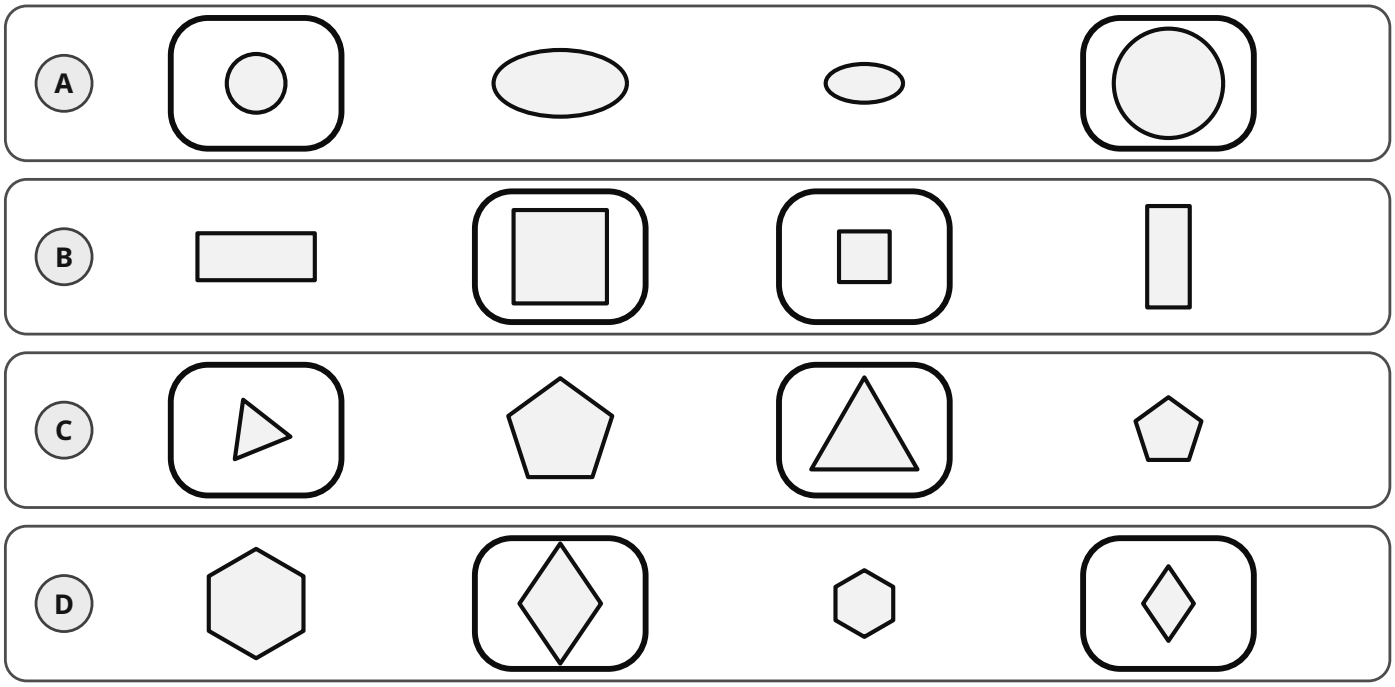

Example: same shape!

1. Match each small shape to its large twin on the right.

2. In each row, circle the 2 shapes of the exact same type.

Noa's tip: look closely at corners and curves so you never mix up circle vs. oval or square vs. rectangle!
