Name : _____ Date : _____

PAPILUMO / Pre-K (ages 4–5) • Answer key

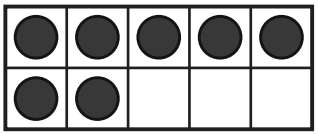

Ten-Frames 1 to 10

Part A: count the dots in each ten-frame and write the number. Part B: read each number and draw that many dots inside the grid.

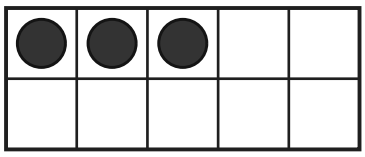

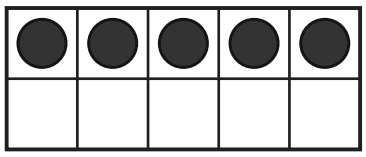

Lumi the hedgehog loves tidy ten-frames! Fill the top row of 5 from left to right first, then add more dots below.

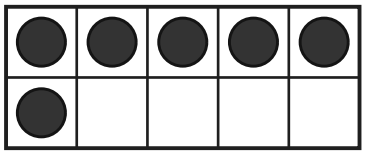

Example: 5 on top + 2 = 7

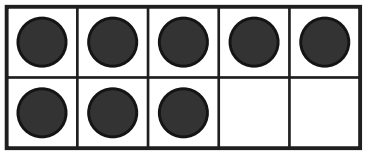

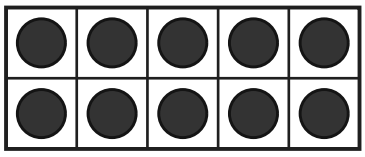

Part A: Count the dots in each ten-frame and write the number in the box

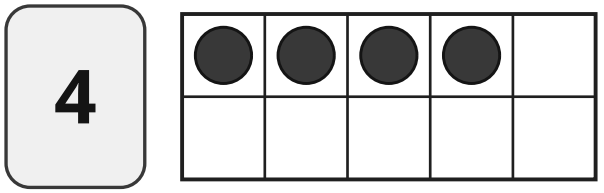

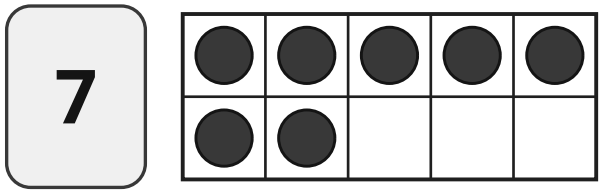

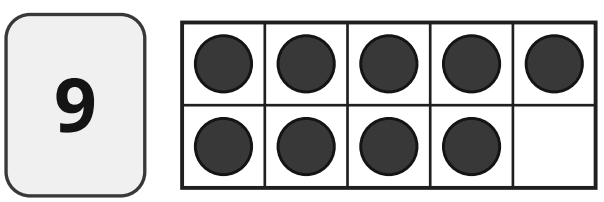

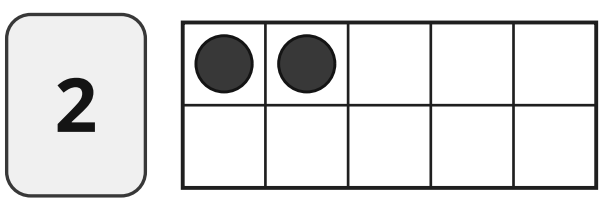

Lumi's 5-Row Tip
The top row always holds 5 dots. Notice when it is full so you can count on 6, 7, 8, 9, 10!

Part B: Read each number and draw dots top-row-first from left to right

Lumi's tip: always fill the top row from left to right up to 5 before drawing any dots in the bottom row!
