Caterpillar Rings: Chained & Concentric Circles

Start at each bold black dot at the top and trace around counterclockwise to close every circle cleanly.

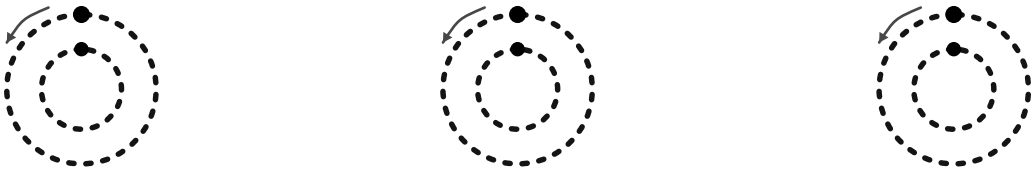

Yum, a fresh leaf ahead! Help Biscotte the hungry caterpillar trace every round body ring touching side by side.

Example: chained rings

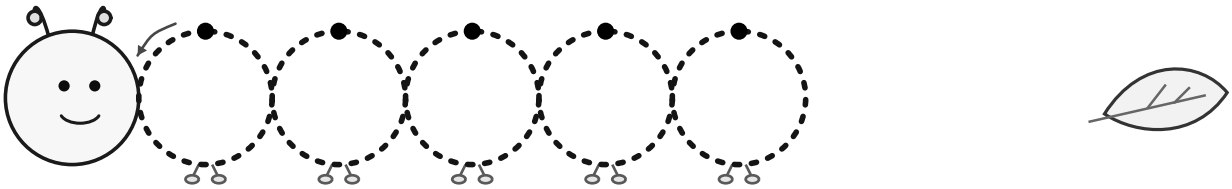

1. Warm-up: 3 double concentric targets (trace outer ring, then inner ring)

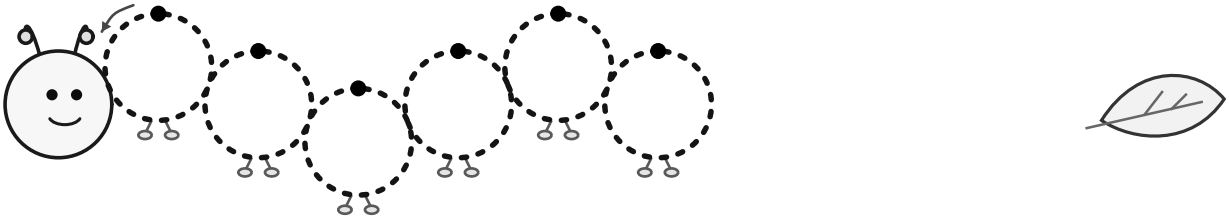

2. Trace all 16 touching circular body rings across the 3 garden caterpillars

Caterpillar 1: 5 large equal circles in a straight row

Caterpillar 2: 6 medium circles along a gentle wave

Caterpillar 3: 5 graduated circles from largest to smallest

Biscotte's tip: start on the bold dot at the top of each circle, curve left counterclockwise, and close the ring neatly!
