Magic-C Curved Letters: c, o, a, d, g, q

Trace the 3 warm-up C-arcs from the start dot, then trace and copy each lowercase letter c, o, a, d, g, and q.

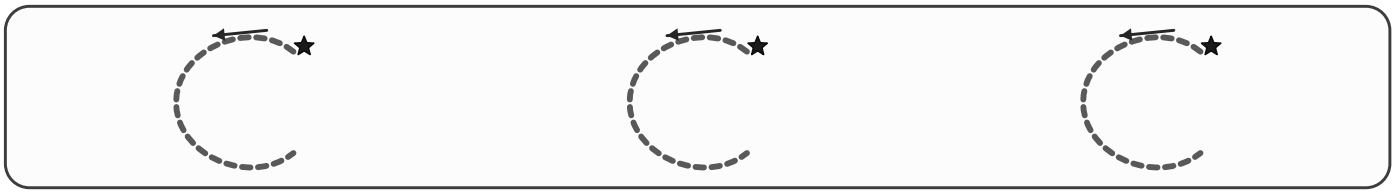

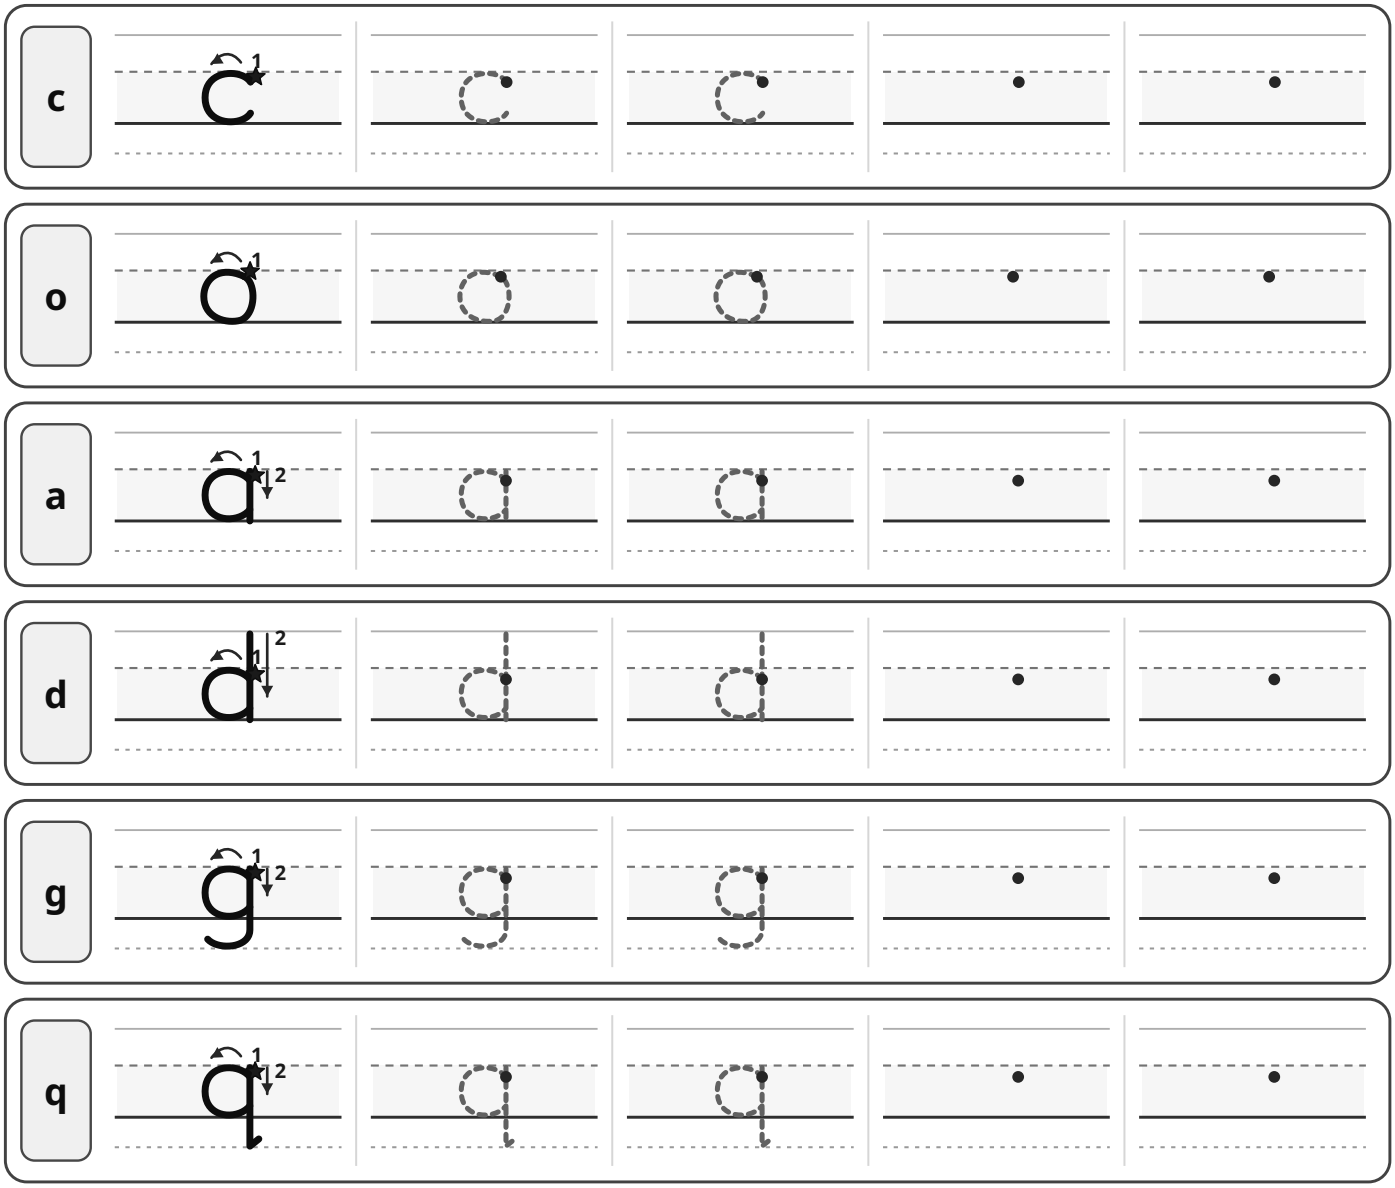

Lulu the Snail curls counterclockwise along her shell! Start at 2 o'clock and curve left first for all six magic-c letters.

Example: magic c stroke path

Warm-up: trace 3 big C-arcs starting at the 2-o'clock dot

Lulu's tip: every magic-c letter begins with the exact same left curve before closing into o or adding a stem for a, d, g, and q.
