Date : _____

PAPILUMO / 2nd grade · guided introduction

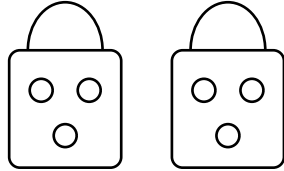

Equal groups: add and multiply

Count the berries in each basket. Complete both number sentences.

Help Lina the hedgehog count the berries for her picnic.

Example: 2 baskets of 3 berries

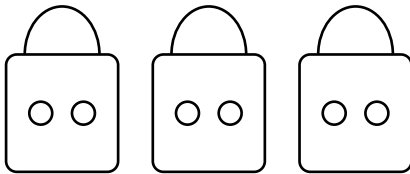

$$3 + 3 = 6$$

$$2 \times 3 = 6$$

2 groups of 3 make 6.

Number of baskets × berries in each basket = total berries

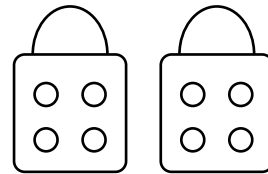

1.

$$\square + \square + \square = \square$$

$$\square \times \square = \square$$

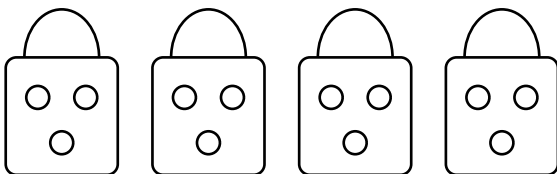

2.

$$\square + \square = \square$$

$$\square \times \square = \square$$

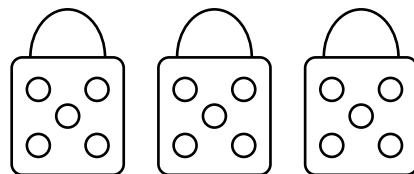

3.

$$\square + \square + \square + \square = \square$$

$$\square \times \square = \square$$

4.

$$\square + \square + \square = \square$$

$$\square \times \square = \square$$

Within each problem, every basket holds the same number of berries.
