

Name : _____

Date : _____

PAPILUMO / Upper elementary · Guided practice

Long division: 2 digits, no remainders

Complete the quotient and working. Check by multiplying.

Ben the badger shares his stamps equally into groups. Find how many are in each.

Example: 72 stamps shared into 3 equal groups

$$\begin{array}{r} \boxed{2} \boxed{4} \\ 3 \overline{) 72} \\ \underline{- 6} \\ \boxed{1} \boxed{2} \\ \underline{- 1} \boxed{2} \\ \boxed{0} \end{array}$$

$$72 \div 3 = 24$$

$$24 \times 3 = 72$$

Divide, multiply, subtract, then bring down the next digit.

After subtracting the tens, bring down the ones to form the next number.
