My Pumpkin Grid Drawing

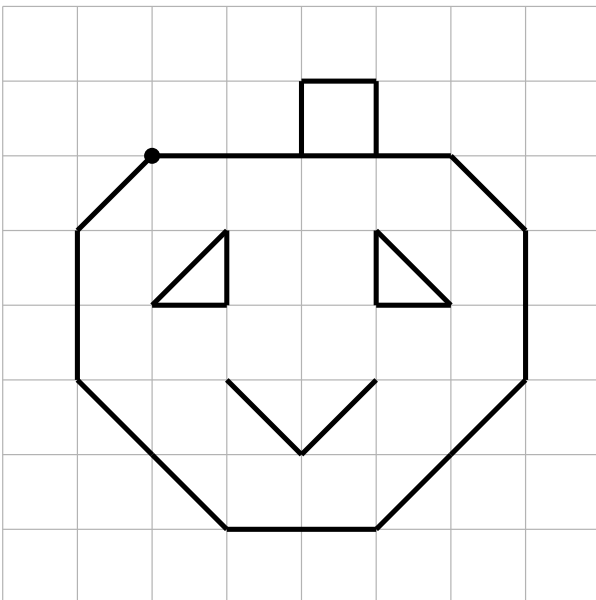

Look at the model. Copy all its lines into the grid on the right.

Pip is making a lantern. Help him copy his pumpkin!

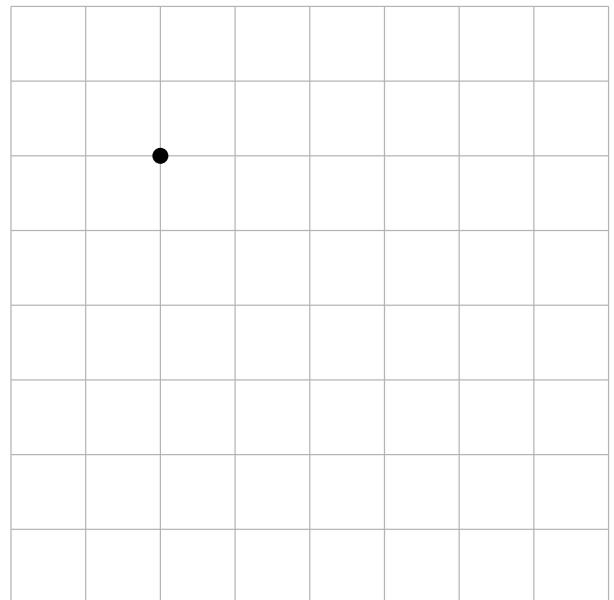

1. Find the starting dot in both grids.
2. Count squares to place each corner.
3. Join the points, then add the stem and face.

MODEL

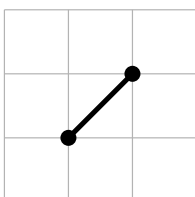

YOUR TURN!

Check: closed outline, stem, two eyes and a smile.

A small move to get started

One square left and one square down.
Join the two points with a diagonal line.

You can color your pumpkin after checking the lines.
