Nome : _____ Data : _____

PAPILUMO / Classe prima (6–7 anni)

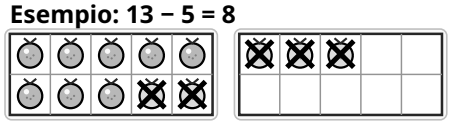

Sottrazioni fino a 20 con tabelle del dieci

Sbarra le bacche da togliere (svuota prima la seconda tabella per tornare a 10), poi scrivi il risultato.

Mimi la topolina pasticciera prepara vassoi da 10 bacche. Aiutala a scoprire quante ne restano dopo ogni ordine!

Esempio: 13 − 5 = 8

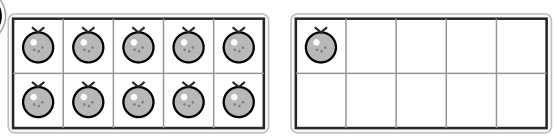

13 − 5 = **8**

13 − 3 = 10
↓
10 − 2 = 8

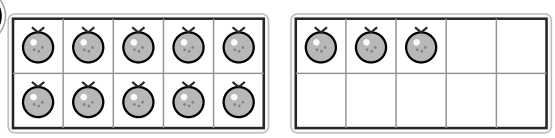

13 bacche = 10 + 3. Sbarra 3 nella 2ª tabella (torni a 10) e 2 nella 1ª: restano 8.

1

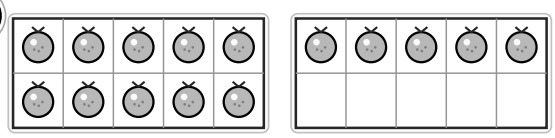

11 − 4 = ☐

2

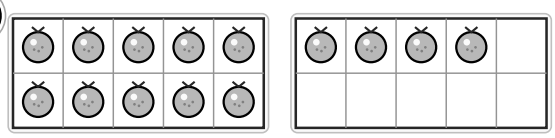

13 − 7 = ☐

3

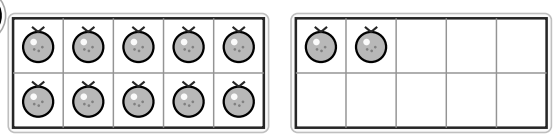

15 − 6 = ☐

4

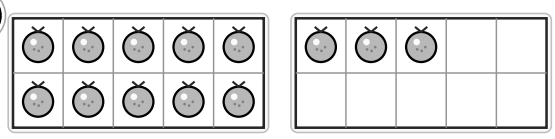

14 − 9 = ☐

5

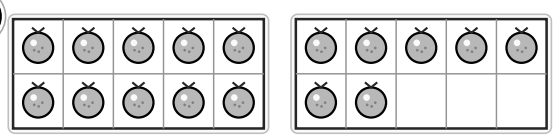

12 − 4 = ☐

6

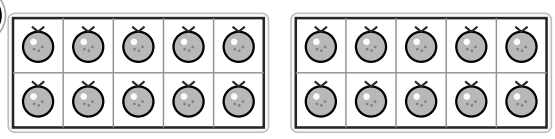

13 − 9 = ☐

7

17 − 5 = ☐

8

20 − 6 = ☐

Consiglio: passa dal 10! Per 14 − 9 togli prima 4 per arrivare a 10, poi ancora 5: 10 − 5 = 5.
