# Sottrazioni sulla linea dei numeri fino a 20

Parti dal primo numero, disegna ogni salto all'indietro e scrivi la differenza.

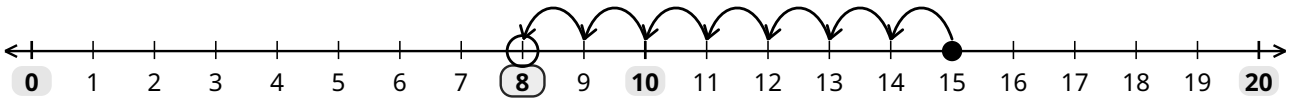

**Kiko il canguro saltella all'indietro sul sentiero! Conta con lui ogni salto verso sinistra fino al traguardo.**

**Esempio: 14 − 6 = 8 (parti da 14 e torna indietro di 6 salti)**

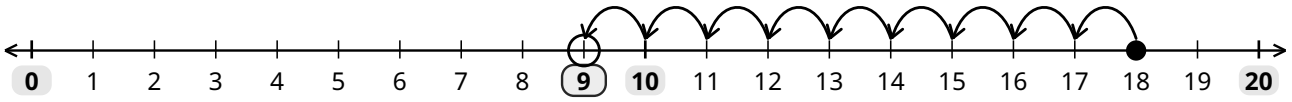

- Non contare il 14 come salto: conta 1 quando atterri sulla tacca del 13.

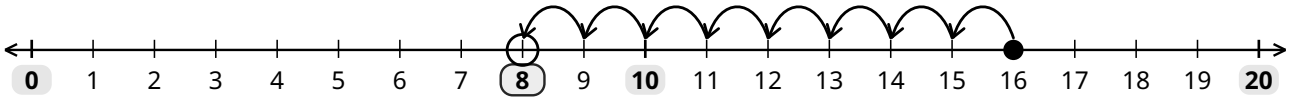

**1** **15 − 7 =** **8**

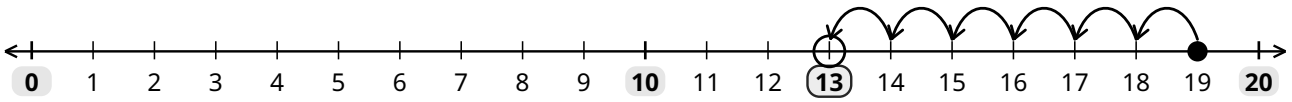

**2** **18 − 9 =** **9**

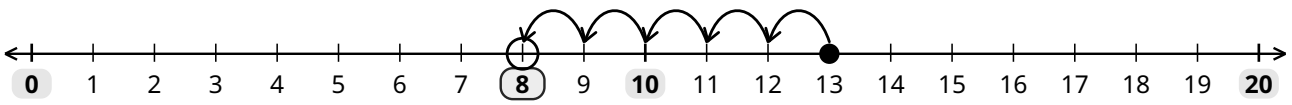

**3** **16 − 8 =** **8**

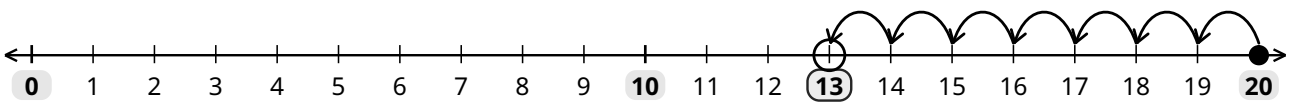

**4** **19 − 6 =** **13**

**5** **13 − 5 =** **8**

**6** **20 − 7 =** **13**

- Consiglio di Kiko: unisci con un arco preciso due tacche vicine, senza saltare mai nessun numero.
