Nome : _____ Data : _____

PAPILUMO | Infanzia 5 anni (5–6 anni)

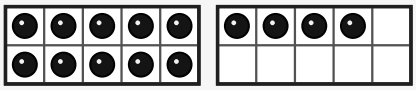

Numeri da 11 a 19 (cornici del dieci)

Osserva l'esempio di Coco, completa 10 + _ = __ in ogni scheda e disegna i punti mancanti per 17 e 19.

Ciao, sono Coco il coniglio! Una cornice piena vale sempre 10: conta i punti in più per trovare ogni numero!

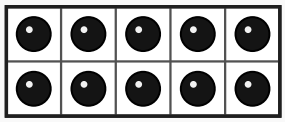

Esempio svolto: 1 cornice piena (10) + 4 punti = 14

10 + 4 = 14

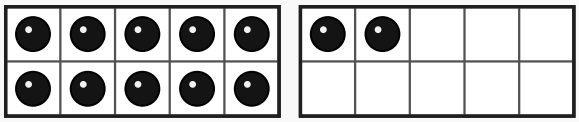

1. Conta i punti nelle due cornici e completa l'addizione

1

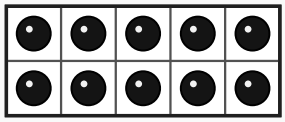

10 + ____ = ____

2

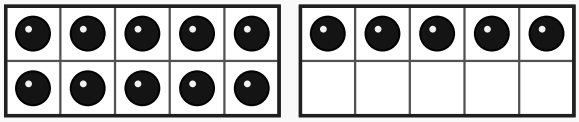

10 + ____ = ____

3

10 + ____ = ____

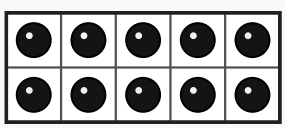

4

10 + ____ = ____

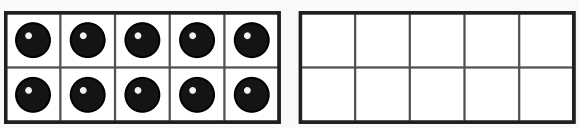

2. Disegna i punti mancanti nella seconda cornice e scrivi l'addizione

5 — Numero : 17

10 + ____ = ____

6 — Numero : 19

10 + ____ = ____

Consiglio di Coco: non ricontare da 1 la prima cornice piena; parti subito da 10 e prosegui con i punti della seconda cornice.
