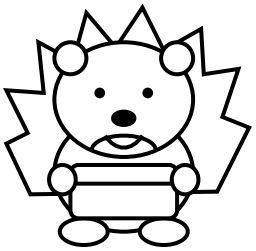
PAPILUMO / Soluzioni

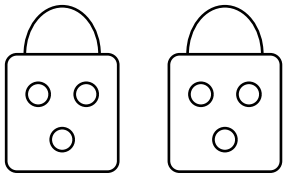
Gruppi uguali: addizione e moltiplicazione

Conta le bacche in ogni cestino. Completa le due operazioni.

Aiuta Lina la riccia a contare le bacche per il suo picnic.



Esempio: 2 cestini con 3 bacche ciascuno



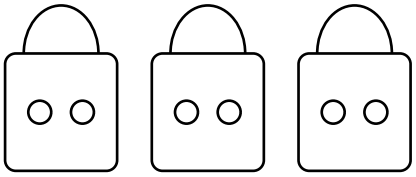
3 + 3 = 6

2 × 3 = 6

2 gruppi da 3 fanno 6.

Numero di cestini × bacche per cestino = bacche in tutto

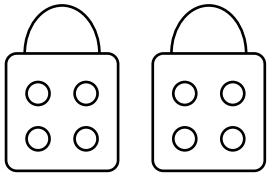
1.



2 + **2** + **2** = **6**

3 × **2** = **6**

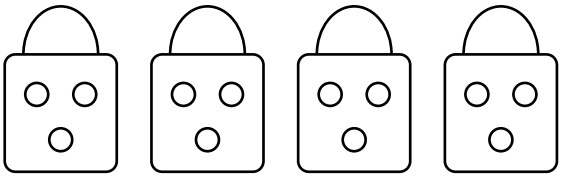
2.



4 + **4** = **8**

2 × **4** = **8**

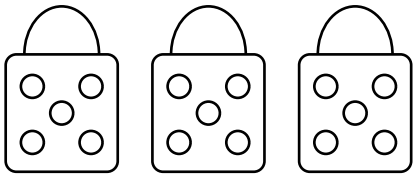
3.



3 + **3** + **3** + **3** = **12**

4 × **3** = **12**

4.



5 + **5** + **5** = **15**

3 × **5** = **15**

In ogni esercizio, tutti i cestini contengono lo stesso numero di bacche.
