PAPILUMO / 4.º ano (9–10 anos)

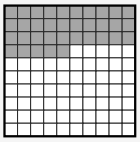

Percentagens em grelhas de 100

Lê as seis grelhas para escrever a fração sobre 100 e a percentagem, depois pinta exatamente 30% e 65% nas duas grelhas em branco.

A castora Mina cria mosaicos em placas de 100 quadrículas. Ajuda-a a registar cada padrão como fração sobre 100 e em percentagem!

Exemplo: 35 quadrículas sombreadas em 100 = 35/100 = 35%

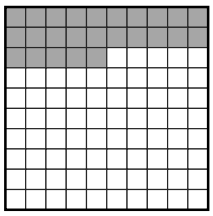

$\rightarrow \frac{35}{100} =$ **35%**

Grelha 10 × 10 = 100 quadrículas

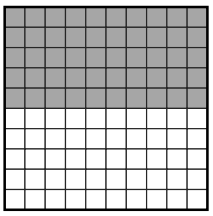

1. Conta as quadrículas sombreadas e escreve a fração sobre 100 e a percentagem (%)

1

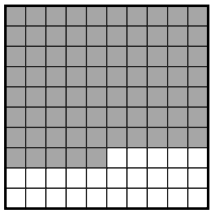

$\frac{\square}{100} = \square\,\%$

2

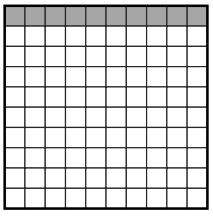

$\frac{\square}{100} = \square\,\%$

3

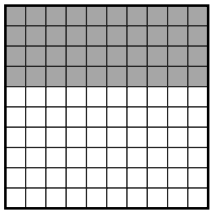

$\frac{\square}{100} = \square\,\%$

4

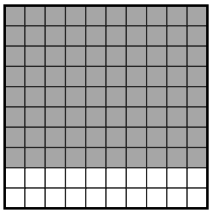

$\frac{\square}{100} = \square\,\%$

5

$\frac{\square}{100} = \square\,\%$

6

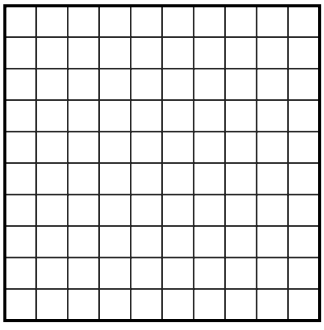

$\frac{\square}{100} = \square\,\%$

2. Pinta exatamente o número certo de quadrículas para representar cada percentagem

7

30%

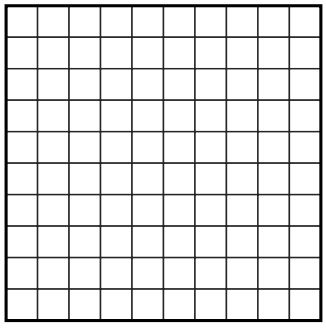

10 × 10 = 100 quadrículas

8

65%

10 × 10 = 100 quadrículas

Dica: «por cento» significa «em 100». Cada fila completa de 10 quadrículas vale 10/100, ou seja, 10%!
