PAPILUMO / 2.º ano (7–8 anos)

Grelhas de multiplicação

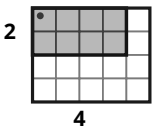

Começa no ponto superior esquerdo, pinta as linhas e colunas pedidas na grelha e completa as duas igualdades.

Dica: parte do ponto superior esquerdo para contar linhas abaixo e quadrados à direita!

A Uma, a ursa construtora, desenha terraços em mosaicos: pinta cada retângulo!

Exemplo resolvido: 2 linhas de 4 quadrados

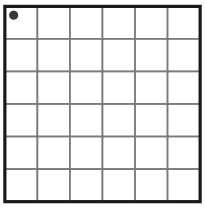

4 + 4 = 8

2 × 4 = 8

1. Pinta cada retângulo na grelha 6×6, escreve a adição repetida e o produto (A–F)

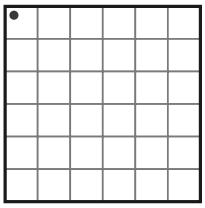

A 2 linhas × 5

□ + □ = □

2 × 5 = □

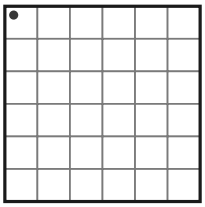

B 3 linhas × 4

□ + □ + □ = □

3 × 4 = □

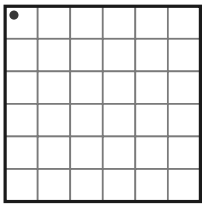

C 4 linhas × 5

□ + □ + □ + □ = □

4 × 5 = □

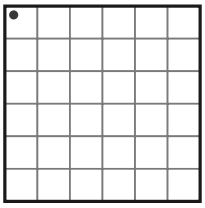

D 3 linhas × 6

□ + □ + □ = □

3 × 6 = □

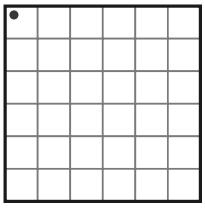

E 5 linhas × 2

□ + □ + □ + □ + □ = □

5 × 2 = □

F 4 linhas × 4

□ + □ + □ + □ = □

4 × 4 = □

Dica da Uma: o primeiro número mostra quantas linhas descem; o segundo indica quantos quadrados tem cada linha.
