Figuras congruentes (forma e tamanho)

Compara as figuras nas grelhas de pontos: rodeia Sim ou Não na parte 1 e rodeia a ÚNICA figura congruente em cada linha.

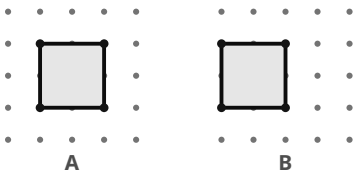

O Tao o tucano geómetra verifica se duas figuras têm exatamente a mesma forma e tamanho, mesmo rodadas!

Exemplo: mesma forma e tamanho?

1. Compara a figura A e a figura B nos pontos. Rodeia Sim (congruentes) ou Não:

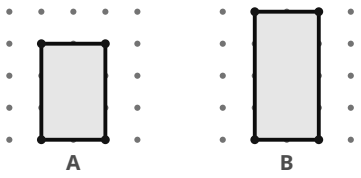

1

Sim / Não

2x2 = 2x2

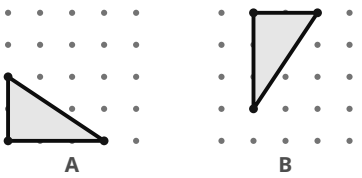

2

Sim / **Não**

2x3 != 2x4

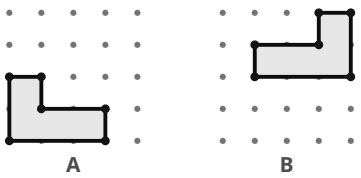

3

Sim / Não

3x2 = 3x2

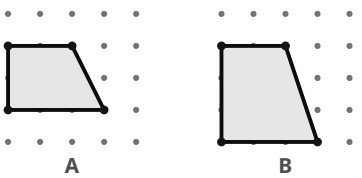

4

Sim / Não

3x2 = 3x2

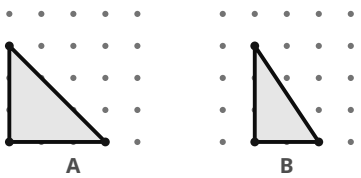

5

Sim / **Não**

h=2 != h=3

6

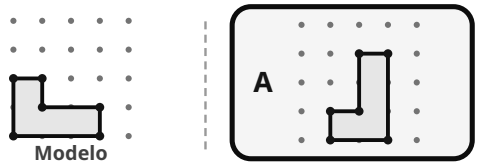

Sim / **Não**

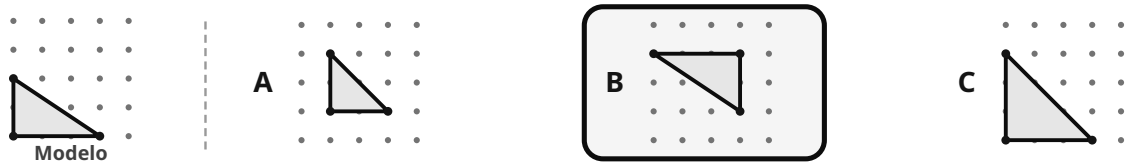

3x3 != 2x3

2. Observa o modelo à esquerda e rodeia a ÚNICA figura rodada congruente (A, B ou C):

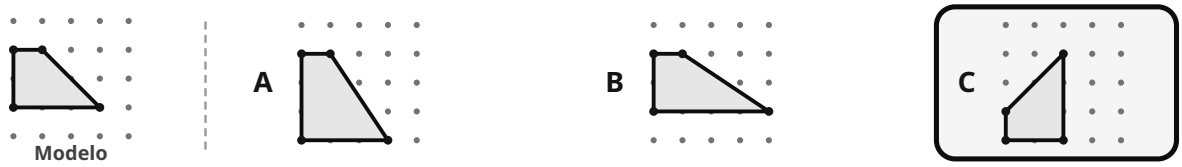

1

2

3

Dica do Tao: conta os espaços entre os pontos em cada lado reto; rodar uma figura nunca muda os comprimentos!
