

Os enigmas do Milo

Descobre o valor das duas figuras em cada cartão.

Ajuda o Milo a resolver os seus seis casos!

Exemplo: descobre o círculo e usa o seu valor.

$$\begin{array}{lcl} \bigcirc + 2 = 5 & \longrightarrow & \bigcirc = \boxed{3} \\ \bigcirc + \triangle = 7 & \longrightarrow & \triangle = \boxed{4} \end{array}$$

$$3 + 2 = 5$$

$$3 + 4 = 7$$

1.

$$\begin{array}{lcl} \bigcirc + 1 = 3 \\ \bigcirc + \triangle = 5 \\ \bigcirc = \boxed{} & \triangle = \boxed{} \end{array}$$

2.

$$\begin{array}{lcl} \bigcirc + 2 = 6 \\ \bigcirc + \triangle = 6 \\ \bigcirc = \boxed{} & \triangle = \boxed{} \end{array}$$

3.

$$\begin{array}{lcl} \bigcirc + 4 = 7 \\ \bigcirc + \triangle = 8 \\ \bigcirc = \boxed{} & \triangle = \boxed{} \end{array}$$

4.

$$\begin{array}{lcl} \bigcirc + 2 = 7 \\ \bigcirc + \triangle = 9 \\ \bigcirc = \boxed{} & \triangle = \boxed{} \end{array}$$

5.

$$\begin{array}{lcl} \bigcirc + 5 = 7 \\ \bigcirc + \triangle = 8 \\ \bigcirc = \boxed{} & \triangle = \boxed{} \end{array}$$

6.

$$\begin{array}{lcl} \bigcirc + 1 = 5 \\ \bigcirc + \triangle = 7 \\ \bigcirc = \boxed{} & \triangle = \boxed{} \end{array}$$

No mesmo cartão, cada figura mantém o mesmo valor.

Novo cartão, novos valores! Confere as duas adições.
